#1)find the set of words that is vocabulary of words
#2)find the frequency of each word in the vocabulary
#3)arrange them in descending order of their frequencies
#4)give rank to them that is indexing
#5)now replace each word of review with those index values
#6)If for particular word, we don't have index values then replace that
word in review by zero
#7)perform padding
#8)apply LSTM algorithm
